CLEAN EDGE DISH RACK

Space to Breathe

Premium Minimalism

A New Standard in Single-Tier Dish Drying

Elevate Your Kitchen with Refined Design

Premium Minimalism

By removing unnecessary elements, we highlight the beauty of premium materials and a clean, simple structure. The refined lines and surfaces of the single-tier rack add a sophisticated touch to any modern kitchen.

Open & Airy Design

The low-profile, single-tier design reduces visual clutter, making your kitchen feel more spacious and comfortable.

Optimized Workflow

The single-tier design eliminates the hassle of lifting dishes onto a second level and prevents water from dripping from above. It also makes loading, unloading, cleaning, and removing water stains easier.

Hexagonal Steel Wire Frame

The 8 mm hexagonal steel wire frame combines a refined appearance with structural stability. Its thick, durable construction helps maintain reliable support with minimal deformation over time.

Expandable Main Body

The sliding extension tray provides extra space whenever needed. Closely spaced base wires and reinforced joints enhance durability, while the seamless connection between the basket and extension tray accommodates larger kitchenware.

Key Features

Tray Guide Loop

The guide wire prevents the tray from slipping out or tilting. The tray slides smoothly and steadily for easy extension.

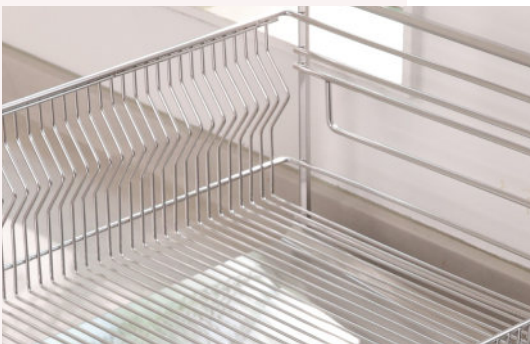

Roller Feet

Roller feet help the extension tray slide out smoothly.

Plate Supports

Securely holds plates in place for neat storage and efficient drying.

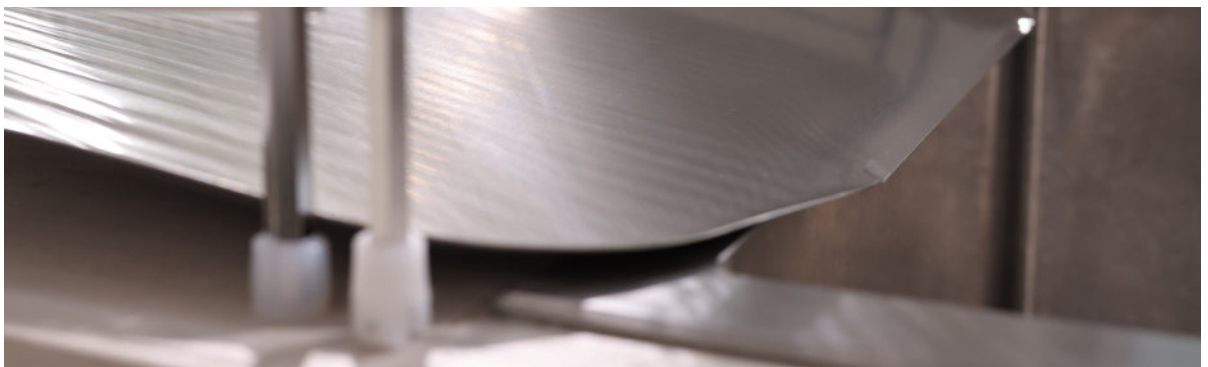

Deep Storage Basket

With sides 14.5 cm high, the basket securely holds kitchenware of various sizes.

304 Stainless Steel Construction

SUS 304 stainless steel offers excellent durability and corrosion resistance for hygienic, long-lasting everyday use.

Auto-Draining Water Tray

Sloped sides guide water toward the center for efficient drainage. Water drains away as dishes dry, helping keep your kitchen clean.

Clean Edge Neo Dish Drying Rack

Size : (W) 52 × (D) 31.5 × (H) 24.5 cm (Depth 56 cm with tray extended)

Components : Main Body, Water Tray, Utensil Pocket
